德古意特数据库功能与使用

3.1 De Gruyter数据库平台——主界面

The screenshot displays the De Gruyter website's main interface. At the top right, there are links for 'Log in', 'Register', 'Help', and 'Deutsch'. Below these are dropdown menus for 'My Content (10)' and 'My Searches (5)'. A search bar is labeled 'Search De Gruyter Online' with a magnifying glass icon and a link to 'Advanced Search >'. The 'DE GRUYTER' logo is on the top left. A 'MY CART' button with a shopping cart icon and '(0)' items is on the right. The left sidebar lists 'SUBJECTS' with categories like Architecture and Design, Arts, Asian and Pacific Studies, Business and Economics, Chemistry, Classical and Ancient Near Eastern Studies, Computer Sciences, Cultural Studies, Engineering, General Interest, Geosciences, History, Industrial Chemistry, Jewish Studies, Law, Library and Information Science, Book Studies, Life Sciences, and Linguistics and Semiotics. The main content area features a 'PRODUCT TYPES' dropdown and a large banner for 'DE GRUYTER PAPERBACK EDITION' showing hands holding an open book. Below the banner is a text block: 'Now available: Select hardcover titles as paperbacks for the first time. De Gruyter now offers you selected titles, previously only available in hardback editions, as paperback versions. That lets students in particular access some of our range of publications at a lower price point, reducing barriers to studying and research. > Full list of paperback titles'. At the bottom left of the main area is a 'HIGHLIGHTS' section. On the right, there is a 'LOGIN' section with input fields and a '提交' button, with links for 'Forgot your password?' and 'Don't have an account?'. Below that is 'ACCESS CONTENT THROUGH YOUR INSTITUTION' with a link to 'Institution'. At the bottom right is a 'DE GRUYTER NEWSLETTER' sign-up section with an envelope icon, text about free regular emails, and a 'SIGN UP NOW!' button with a right arrow.

Abstract

The activities of natural radionuclides in the environment can be used to assess radiological effects. Monitoring the radiation level in soils is important for public health. It also has important geochemical implications as most of the sediment eroded from river basins is from soil. Therefore, we carried out a soil sampling campaign along a subtropical river basin in southeastern China (Jiulong River). Surface and depth profile soils were collected, and the natural radionuclide activities were measured. The activities of the natural radionuclides ^{238}U , ^{232}Th , and ^{40}K in the surface soils varied from 31.6 to 132.1 Bq kg-dry $^{-1}$, 37.8 to 174.0 Bq kg-dry $^{-1}$, and 52.3 to 596.2 Bq kg-dry $^{-1}$, with average values of 56.7±30.3 Bq kg-dry $^{-1}$, 86.7±41.3 Bq kg-dry $^{-1}$, and 352.8±190.6 Bq kg-dry $^{-1}$, respectively. The absorbed gamma dose in air and the annual effective dose equivalent (AED) in surface soils along the river basin were both higher than the

Overview

Aims and Scope
This series publishes outstanding monographs and edited volumes that investigate all aspects of Kant's philosophy, including its systematic relationship to other philosophical approaches, both past and present.

Studies that appear in the series are distinguished by their innovative nature and ability to close lacunae in the research. In this way, the series is a venue for the latest findings in scholarship on Kant.

Series Overview

- Vol. 182: Raedler, Sebastian: Kant and the Interests of Reason (2015)
- Vol. 181: Rollmann, Veit Justus: Apperzeption und dynamisches Naturgesetz in Kants Opus postumum (2015)
- Vol. 180: Rivero, Gabriel: Zur Bedeutung des Begriffs Ontologie bei Kant (2014)
